The majority of fatal accidents have these common root causes

- Failure to identify hazards

- Failure to manage risks

SLAM Risks the SMART Way!

Miners:

Stop	Think through the task
Look	Identify the hazards for each job step
Analyze	Determine if you have the proper knowledge, training, and tools
Manage	Remove or control hazards and use proper equipment

Mine Operators:

Stop	Isolate each step in a task and identify past and potential accidents, injuries, and violations.
Measure	Evaluate the risks associated with the task and barriers that have allowed hazards to cause injuries
Act	Implement controls to minimize or eliminate any hazards that make the risk unacceptable
Review	Conduct frequent work site visits to observe work practices and audit accidents, injuries, and violations to identify root causes
Train	Develop a human factor-based action plan and then involve and train the miners

Make the RIGHT Decision!
